

NiCE Active 365 Monitor for Azure is Microsoft Co-Sell Ready

NiCE Active 365 Monitor for Azure

Azure and the Digital Journey

Delivering a robust user experience to customers, partners and the company's workforce has never been more crucial and in the focus of IT departments. While working from anywhere, anytime and on any device is the new normal, the complexity of managing networks, applications and the IT infrastructure has become infinite.

Turning to Azure helps enterprises in their DX journey to meet their users' needs for a fast, seamless and secure digital experience. Azure uses secure storage, powerful computing and integrated data analytics to support distributed applications, helping businesses to improve their customer and user satisfaction.

Azure Marketplace

Azure-related add-ons and services have been put together under one Microsoft roof to help companies and Microsoft Partners streamline deployment and management.

Co-Sell Ready solutions are curated and approved by strict Microsoft guidelines.

What is Azure Co-Sell Ready

Microsoft's global network of internal and partner executives utilizes the Microsoft Co-Sell Ready status to identify Microsoft accredited solutions.

Co-Sell Ready partners are a selected group of software vendors meeting Microsoft technical and business standards delivering optimized and secured solutions.

Microsoft Co-Sell helps Microsoft Partners and their customers build rich solutions, spanning multiple partner offerings. Azure and third-party solutions can be joined in one single subscriptions model to make the roll-out easier for partners and customers.

NiCE is Co-Sell Ready

NiCE has achieved the Microsoft Co-Sell Ready status with its Microsoft 365 Service monitoring solutions for Teams, SharePoint, OneDrive, and Exchange.

The NiCE Active 365 Monitor for Azure is [available on the Azure Marketplace](#).

About NiCE

NiCE is a longterm Microsoft Partner with a Gold Cloud Platform and Gold Datacenter competency. NiCE supports companies to gain more from hybrid Azure deployments, application performance and security, by individually extended and optimized monitoring.

NiCE enables **advanced Microsoft 365 service delivery monitoring** for Azure-hosted Teams, SharePoint, OneDrive, and Exchange deployments. This helps to identify and report any performance issues when or even before users are affected. Detailed information gives your helpdesk clear insight into the users' environment and related service delivery issues. All monitoring information is secured by the Microsoft Azure deployment, meeting current security standards.

"We are excited to join the Microsoft Co-Sell Ready program," says Horst Nebenführ, CEO and Founder of NiCE IT Management Solutions GmbH. "Helping companies provide cutting-edge Microsoft 365 service delivery on Azure is a great motivator, and one step further taken on the road of Digital Experience Optimization. Azure is a growing market and will keep shaping the future of computing services. We are proud to be part of the journey."
